A swath of wind damage was found across central Vernon County southwest through south of Viroqua along County Road NN and Getter Road. In this area, approximately 4 miles southwest of Viroqua, a barn was damaged and a roof was taken off a garage. Farther east along Getter Road, a barn was leveled, a small metal shed was destroyed and a field of sunflowers was damaged. The damage was initially believed to be caused by a tornado, but the storm survey did not find sufficient evidence to classify this as a tornado.

Thunderstorms developed ahead of a cold front and tracked across western Wisconsin during the evening of August 30th. These thunderstorms produced some wind damage and a mudslide east of Alma (Buffalo County).
